Local Breezes

Play on any ship when activated and roll a

die to determine the radius of the breeze

in hexes (0-3: 2 hexes, 4-6: 4 hexes, 7-8:

6 hexes, 9: 8 hexes). Any unit(s) within

this radius may modify its movement rate

by plus or minus two movement

points (up to a maximum of a

three-point adjustment).

#### Initiative Effects: Command: +2 Speed: Tacking: -2 Wear: 2 Firing: -2

### Tack In Succession

Play on any command or individual ship when activated. The individual ship or ships in the command make a single die roll to tack, adding +2 to the die roll.

## "To Rule the Waves!"

Play in the command determination phase. Select a ship without a commander. For the duration of the turn, it is assumed to be temporarily stacked with one with a Command Radius of '3' and a Quality of '2.'

- OR -

Deduct two (-2) from a Rake attempt.

# Repeaters

Smaller ships signal orders to the rest of the fleet. Play on any commander during the command determination phase. The selected commander doubles his Command Radius.

- OR -

Play on a fired ship and allow it to fire one broadside again at any time.
